

Message from the President, NMSS

Dear NMSS Members

It is my immense pleasure to welcome you all to the official website of NMSS.

NMSS was established in 1986 AD (2043 BS) with the broad objective of uniting all the medical students in the country. It is guided by the two noble aims for working on student welfare and public health in the country. From the very first date of its establishment we have been working on promotion and upliftment of medical education within the country and motivating the medical students to use their knowledge in the promotion of the overall health status of the country through different programs organized in the form of free health camps, celebration of different WHO events as the health awareness campaigns, school health programs and so on. Also we have been working actively to unite all the medical students in the country under one umbrella by ensuring their equal participation of all the student in the activities organized by it.

On the present situation of the health system of the country and the unstable political and economic scenario, it becomes the responsibility of all of us to contribute to the health services and health education of the country by our unanimous effort. I would like to welcome all the medical students of the country to join hands for our better future.

I would like to thank all the members of NMSS, our mother organization IFMSA, WHO, medical institutes of the country, different NGOs and INGOs and all our well wishers for being by our side in all the leaderships we have taken.

Wishing you all a bright future ahead.

Rakesh Kumar Gami
President
NMSS
